

RENOVATION

White Plains Children's Library

White Plains, New York

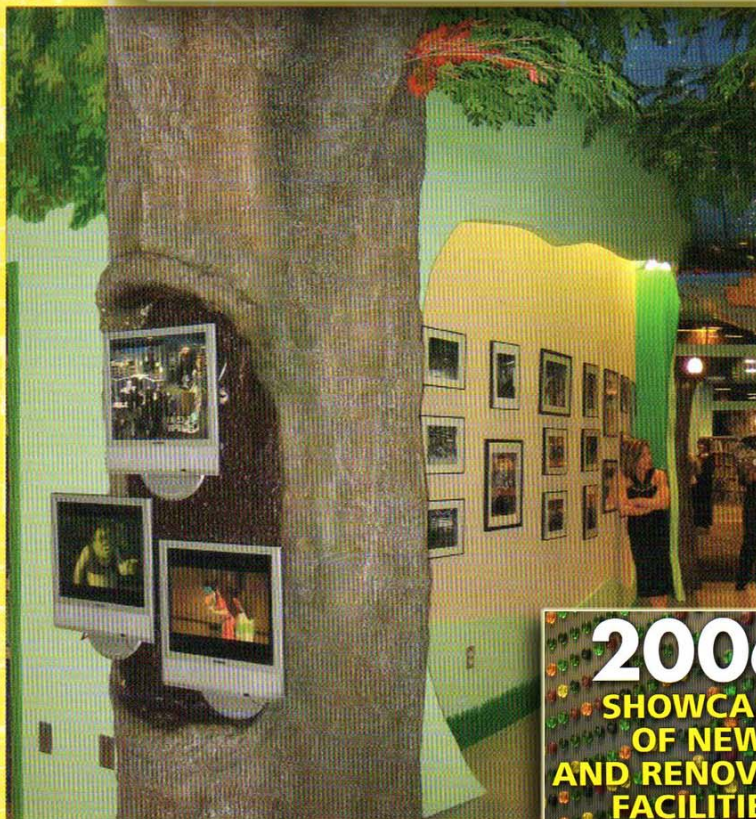

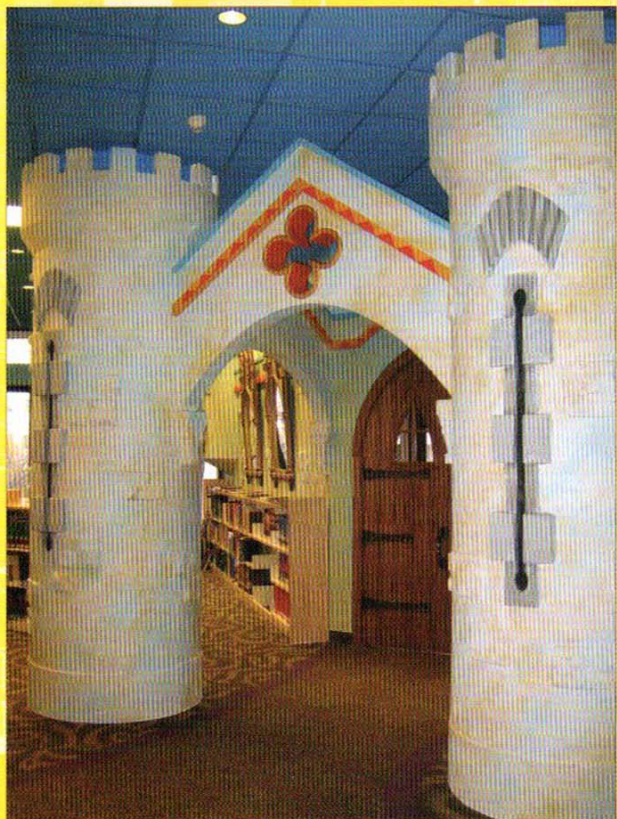

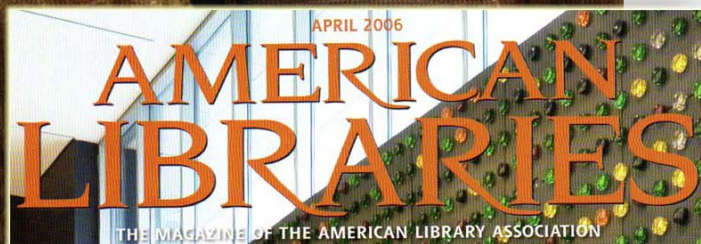

JANICE DAVIS DESIGN
WWW.JANICEDAVISDESIGN.COM

Size: 13,000 sq. ft.

Cost: \$332,000

Without doing any structural renovation, Janice Davis completely transformed the children's area of the White Plains Library through an array of fantasy decor. Highlights include the World of Children's Books—which identifies places on the globe where celebrated children's stories take place—over the circulation desk, a video-viewing cave, a forest trail display, and an activity room accessed through a castle entrance.
